

# 5082E

## Tractor

### Features & Specs

- 3-year or 2,000-hour warranty
- Customisable in up to 21 different versions
- Dry air filter with safety element
- PowerTech engine, guaranteed technology and efficiency

Maximum PTO power - Certified by OCIMA <sup>1</sup>	70.2 hp
Lift capacity certified by OCIMA <sup>2</sup>	1398.3 kgf a 610 mm
Synchromesh transmission	9 forward / 3 reverse
Flow rate to the attachment	60.2 L/min

## Overview

The versatility of a large tractor in a multiple-use tractor.

JohnDeere tractors are guaranteed to completely fulfil your needs. The 5E series tractors are known for their durability, flexibility and versatility, giving you the best performance in any application. The 4-cylinder 4.5-litre displacement PowerTech engine generates a high engine torque level with low fuel consumption. The optional PowrReverser transmission provides greater ease of operation for the operator, thanks to its electrohydraulic PTO coupling. In addition, it is equipped with a wet drive clutch, which extends its service life and reduces maintenance costs.

The manoeuvrability provided by the function that enables the drive direction to be changed without using the clutch is a feature of the PowrReverser transmission with 12 forward and 12 reverse gears. The John Deere 5082E-series tractors combine the versatility of a multiple-use tractor with the features you expect from a large tractor, giving you all the technology that John Deere puts within everyone's reach.

With the values obtained from the CENEMA (Mexican Centre for Agricultural Machinery Standardisation) in accordance with standards.
